

On the Subject of Boggle

Find the words.

- You will be presented with part of a 4×4 boggle board. After finding the complete board in the table below, a score of 5 must be achieved to solve the module using standard boggle scoring. You may only press a letter adjacent to the previously selected letter, and words must be at least 3 letters long.
- To submit a word, simply press the letters of the word in order. After 2 seconds of not receiving an input, the word will be submitted. If it is not a word or has already been submitted, a strike will occur. A running score count is visible at the top of the module.
- It can be assumed that all 'Q's have a 'U' after them and count as two letters. For example, QEST on the board is Quest and is valid.
