# On the Subject of Complicated Buttons

These buttons aren't like the others. The good news is that we've found a concise set of instructions on what to do about it! Maybe too concise...

1. Each button has one or two colors, and a label.
2. For **each** button, use the Venn diagram below to decide whether or not to press the button.
3. Press the buttons in the order listed in the table. If no buttons are pressed, press the second button in the list.
4. **Upon getting a strike, the entire module resets.**

		Button has red coloring
		Button has blue coloring
		Button says "Press"
		Button is in the middle position

Letter	Instruction
P	Press the button
D	Do not press the button
R	Press the button if the serial number contains two or more repeated characters
S	Press the button if the bomb has a serial port
B	Press the button if the bomb has two or more battery holders

Button order:	Label of First Button	0-1 Batteries	2-3 Batteries	4-5 Batteries	6+ Batteries
	Press	1, 2, 3	2, 3, 1	3, 1, 2	1, 2, 3
	Hold	2, 1, 3	3, 2, 1	1, 3, 2	2, 3, 1
	Detonate	3, 1, 2	1, 2, 3	2, 1, 3	3, 1, 2
