

On the Subject of D-CRYPT

GREETINGS, EARTHLINGS.

The module presents you with five alien glyphs.

Each glyph corresponds to a letter according to the Glyph Table.

Taken together, the five glyphs spell a word from the Word Table going in reading order.

Upon holding a glyph, it will cycle through the entire alphabet of glyphs. Releasing will lock in the current glyph displayed.

Once all five glyphs have been locked in, the module will submit the word formed by the glyphs.

To determine the word you need to submit, take the word on the module and move forward in reading order in the Word Table equal to the number of batteries plus the last digit of the serial number, looping around if necessary.

If that number is zero, use 7 instead.
