On the Subject of Paying Respects

Press F to pay respects. Unless you're EA, then it's "press F to pay".

This module presents a very important request. Once it activates it expects you to deliver on its request within 30 seconds.

Each time you deliver on its request you'll increase the time by 1 second. Continually deliver on its request to gain important time to solve other modules.

Failure to deliver on the module's request long enough will cause a strike, and the module will wait to ask you again.

F.
