

On the Subject of Sugar Skulls

Success doesn't come for free. You have to do whatever it takes to seize your moment.

- Three skulls will be displayed, forming a line of 3 in the table below, horizontally, vertically, or diagonally. Identify which skull is in the middle cell.
- Take which position in its cell this skull has (left, right, or middle). Then modify this position based on the color of its display's frame:
 - **Red:** Stay in place.
 - **Orange:** Move one step left.
 - **Purple:** Move one step right.
- Select the skull whose position in its cell is this new position to disarm the module.
